# CSE7302 - INTERNSHIP

## Review-2 Presentation

## TITLE OF THE PROJECT / WORK ASSIGNED / DOMAIN

| Student Details | |
|---|---|
| **Name** | THANUSH G GOWDA |
| **Roll No** | 20221COM0088 |
| **Section** | 7COM01 |

**Under the Supervision of,**

**Dr. Murali Parameswaran**
**Associate Professor**
**Presidency School of CSE**
**Presidency University**

**Name of the Program:** **Computer Engineering (AIML)**
**Name of the HoD:** **Dr. Gopal Krishna Shyam**
**Name of the Program Internship Coordinator:**
**Name of the School Internship Coordinator:** **Dr. Md Ziaur Rahman**

# Content

- About Company or Organization
- Working domain or the technology
- About your team and reporting Manager
- Challenges Faced in Internship
- Objectives of the work
- Literature Review
- Proposed System
- Problem Statement
- System Requirements
- Advantages of Proposed System/Work
- Internship Roadmap
- Github Link

## About Company or Organization

- **Test Yantra Software Solutions (India) Pvt. Ltd.** is a leading global software testing, quality engineering, and technology services company.
- Founded in **2004**, the company is headquartered in **Bangalore, India**, and serves clients across multiple countries.
- Test Yantra focuses on delivering high-quality IT solutions by combining domain expertise, innovation, and industry best practices.

## About Company or Organization

Test Yantra offers a wide range of IT and quality engineering services, including:

- Software Testing & Quality Assurance
- Automation Testing & Performance Testing
- Digital Transformation Services
- Application Development & Maintenance
- Corporate Training & Skill Development

## About Company or Organization

Test Yantra serves clients across diverse industries such as:

- Banking & Financial Services
- Healthcare
- E-commerce
- Telecom
- Education & Technology

## Working domain or the technology

Domain : Web Technology

Technologies:

- HTML
- CSS
- JavaScript
- ReactJS

# About your team and reporting Manager

- During my internship at **Test Yantra Software Solutions**, I worked as part of a **Web Technology team**.
- The team consisted of a **Reporting Manager/Mentor**, team leads, and interns working collaboratively on assigned tasks.
- Each team member had defined responsibilities, and the work environment encouraged learning, communication, and teamwork.

## Challenges Faced in Internship

- Searching for Internship
- Cracking the Interview
- Adapting to the Corporate Environment
- Understanding Real-Time Projects
- Team Coordination

# Objectives of the work

- To apply theoretical knowledge of **Web Technology** in real-time projects
- To understand the complete web development workflow
- To improve coding standards and problem-solving skills
- To gain hands-on industry experience during the internship

## Literature Review

The study mainly focused on:

- Basics of web development and client–server architecture
- Frontend technologies like **HTML, CSS, and JavaScript**
- Concepts of responsive design and user experience
- Overview of backend integration and database connectivity
- Industry standards, coding practices, and security considerations

## Proposed System / Work

The proposed system focuses on developing a **web-based application** using modern web technologies to provide a user-friendly and efficient solution.

- The proposed work includes:
- Designing responsive and interactive web pages
- Implementing structured layouts using HTML and CSS
- Adding dynamic behavior using JavaScript
- Integrating frontend with backend logic (where applicable)

## Problem Statement

The problem is to improve user experience by designing a responsive and interactive frontend using modern web technologies.

There is a need to design and develop a **responsive, user-friendly frontend interface** using modern web technologies that:

- Improves visual appeal and usability
- Ensures responsiveness across devices
- Provides smooth and interactive user experience

# System Requirements

Hardware Requirements

- Processor: Intel Core i3 or above
- RAM: Minimum 4 GB
- Hard Disk: 20 GB free space
- System: Laptop / Desktop

Software Requirements

- Operating System: Windows / Linux / macOS
- Web Browser: Google Chrome / Mozilla Firefox
- Code Editor: Visual Studio Code

Frontend Technologies:

- HTML
- CSS
- JavaScript

## Advantages of Proposed System/Work

- User-friendly and interactive interface
- Responsive design suitable for all devices
- Improved visual appearance and layout consistency
- Faster user interaction and better experience
- Easy to use and navigate
- Reduces complexity for end users
- Scalable and easy to enhance in the future

# Internship Road Map

Note: Write in the below table what u will be achieving in each review

| Review 1 | Review 2 | Review 3 | Review 4 | Final Review |
|---|---|---|---|---|
| Basics of web technology and understanding project requirement | Frontend development practice and initial project implementation | Advanced features, debugging, and performance improvement | Project refinement, testing, and documentation | Project submission, evaluation, and feedback |
